Indian Stone Relics.

While passing through Greene County, Ohio, recently, I secured some choice archaeological specimens from an old pioneer resident and physician. These were unearthed while excavating and ploughing, and all reputed to be genuine. A panorama of rarities and oddities, remarkable for their superior condition and state of perfection. The successful bidders may well feel proud of their specimens, and are to be congratulated. I will now endeavor to describe them:

- 1—Moundbuilder's pipe, made of hard clay or some soft stone, irregular in shape, as they all are, 3x3 inches, with a large bowl, small hole for stem. I doubt if you could pick up another in the entire state at any price, ex. rare and fine.
- 2—A similar specimen, slightly clipped at one edge, ex. rare.
- 3—Indian skull from South Dakota. All parts present and intact. A truly fine specimen of our native aborigines—the red man. Very scarce in any condition.
- 4—The prize of the collection—a human vertebrae, with a dart imbedded in its very essence, true to life. Coveted by every intelligent, wide-awake collector. Said to be genuine. No offer less than \$10.00 considered, as I have been offered this by several. The penetrating force of these missiles is here truly depicted.
- 5—Small grooved tomahawk, wt. 1½ oz., rough but nicely shaped. Axes of this size are decidedly rare, and send in your bids accordingly.
- 6—Paint-cup with original ochre, the red man's primitive paint. An excellent specimen of the kind, seldom seen even in the finest cabinets. I know the successful bidder would not take a ten-dollar note for it. I value it immensely.

Rare Perfect Ceremonials.

- 7—Bird amulet (squirrel type), polished banded slate. Outside of a few minor chips the piece is about perfect, and as fine an example of this type as I ever saw. Birdstones like this all dealers ask \$15.00 to \$25.00 for. Fakes may be bought for less.
- 8—Birdstone, imperfect, but still a good example, v. rare.
- 9—Indian whistle, 2x2½ inches, of polished banded slate, hole through center, round save one side, which is slightly concave to permit one to whistle handily. An ingenious piece of work, and the finest specimen I ever saw.
- 10—Pick, polished, banded slate, 3 inches in length, hole through center. A beautiful specimen, and should bring near \$10.00.
- 11—Horn-shaped ceremonial, polished, banded slate, equally fine and rare.
- 12—Miniature tomahawk, weighing about ¼ oz. The smallest one of its kind I

ever heard of. It is polished and made out of slate, neatly grooved. Mr. Stilwell and others secured a number of specimens previously, but this one piece the husband bequeathed his wife, and left it to her to cherish as a parting legacy on his death-bed. He valued it above everything else in his collection. It should bring not a cent less than \$25.00, and firmly believe any large museum in the country would be proud to own it.

- 13—Slate ceremonial **charm**, pear-shaped, dark slate, polished, very rare piece.
- 14—**Pendant**, two holes, 3 inches long, slate, triangular shaped, holes drilled from both sides, rare.
- 15—Pendant, one hole, 4 sides, brown colored slate, polished, resembles a flap, very rare.
- 16—Two unfinished, banded slate ceremonials, thick, unique specimens, one shows attempt to drill a hole. These two pieces are shaped like a bow-tie, and make a nice showing. I think \$5.00 each a small price for them.
- 17—**Haemetite**, cone-shaped, **drilled at top**, which is very unusual. I have never seen another like it. It should bring \$7.00 or \$8.00.
- 18—**Haemetite** Celt, 3 inches in length, has a sharp edge, extremely rare and cheap at \$25.00.
- 19—Haemetite plummet, oval in shape, 2 inches in length, perfect in every way. A \$5.00 beauty.
- 20—One smaller but equally rare.
- 21—Stone plummet, also oval in shape, perfect and very rare, granite.
- 22—Paint-stone, cone-shape, stone.
- 23—Gorget, 2-3 inches in length, banded slate. Has two holes, a fine specimen.
- 24—Dark slate ceremonial, grooved on both sides, one edge chipped, rare.
- 25—Butterfly ornament, one side badly damaged; however, the hole through center is represented and makes it still a desirable specimen.
- 26—Small Celt, 3 inches long.
- 27—Large, heavy, **copper** piece, 3½ inches in length and one inch in width. All copper ornaments are valuable. This one is beveled on one side and has the edge of a chisel, ex. rare.
- 28—Large **tube** of red sandstone, curved in shape, with a hole similar drilled clear through, mended in one place. Such a specimen is invaluable to a collector. Cheap at \$10.00.

- 31—One bluish in color, as rare.

- 39—Medium-sized tomahawk, most beautifully grooved, nice color, extra fine and perfect.
- 40—Hammer-stone, a nice one, and very rare in these parts, granite.
